

Target Hamiltonian

f_q, α

Physics targets

Physics relation

$$f_q \approx \sqrt{8f_J f_C} - f_C$$
$$\alpha \approx -f_C$$

Scale inputs

Min--max scaling

Training-set scalers

Machine Learning

Inverse MLP

TransmonCross model

$$f_q, \alpha \rightarrow \ell_{\text{claw}}, s_{\text{ground}}, \ell_{\text{cross}}$$
